Cod. ISO.LASER.100

PROFESSIONAL USE

CABIN 4500 ml
Net Wt. 152,16oz.
Cod. ISO.LASER.100

ACTIVE INGREDIENTS

Distillate of Rose Water
(Rosa gallica extract,
Carbomer)

ACTION

The beneficial effect oldest dates from 1350 AD with rose water, for re-freshing action, made with petals and seeds, which was often used to reduce fever, alleviate inflammation and remove excess heat from the body.

In cosmetics, the distillate of rose water is used in cosmetic products for the care of all skin types because it soothes irritations, moisturizes and cicatrizes.

Use: apply about 2/3 mm of gel on the area to be treated with laser or other suitable equipment. Remove the gel at the end with a small spatula or moistened sponges.

Ingredients: Aqua, Rosa gallica extract, Carbomer, Phenoxyethanol, Imidazolidinyl urea
